ERPFOCUS

RADIUS ERP (FORMERLY EFI RADIUS)

EXTENDED PROFILE

ePS Packaging

OVERVIEW

Radius ERP (formerly EFI Radius) is a dedicated packaging ERP software solution from ePS Packaging, designed for companies in the printing and packaging industry.

It delivers end-to-end functionality from estimating to delivery, while avoiding the lengthy customizations and maintenance that generic platforms often demand.

Unlike one-size-fits-all ERP, Radius ERP embeds specialized tools for flexible packaging job quoting, multi-layer film costing, and EPS block cutting. Core modules include:

- Quoting & Estimating tuned for roll-stock structures and variable-repeat print runs.
  Inventory Control for substrates, inks, lamination films, and EPS blocks
- Production Scheduling that adapts to press-to-finishing workflows and changeovers.
- Shop-floor data collection via touchscreens on press and converting lines.
- Finance & accounting integrated directly with operational data to close the books faster.
- Prepress & MIS integration for seamless handoff from artwork preparation to production.

Radius ERP supports on-premises, private-cloud, or SaaS deployment, so businesses of every size can choose the model that fits their growth plans.

Its dedicated packaging features make it a top choice for companies seeking an ERP for printing and packaging industry needs, whether they specialize in flexible pouches, labels, cartons, or expanded polystyrene (EPS).
