ERPFOCUS

DEACOM ERP

EXTENDED PROFILE

OVERVIEW

Deacom ERP is an all-in-one solution for batch and process manufacturers that want production, inventory, quality, compliance, and financials in one system rather than spread across separate tools.

Now part of ECI's software portfolio, ECI Deacom is for manufacturers that work with formulas, lots, traceability, and regulated production requirements. The system boasts live batch visibility, forecast-aware inventory planning, quality checks at production points, as well as built-in compliance support for industries such as food, beverage, chemicals, pharma, and personal care.

CORE CAPABILITIES:

Deacom ERP unifies core manufacturing, warehouse, quality, and back-office functions, most notably:

- Batch and process manufacturing
- Formula and production management
- Lot tracking and recall support
  Quality control and certificate of analysis workflows
- Inventory planning and forecast-driven replenishment
- Production scheduling, job tracking, and shop-floor control
- Compliance support for GMP, SQF, FDA, GHS, and FSMA-related needs
- AI-assisted invoicing
