ERPFOCUS

VISUAL ESTITRACK EXTENDED PROFILE

Henning Software Incorporated

OVERVIEW

Visual EstiTrack ERP is an on-premises shop management system that runs on all current Microsoft operating systems. Both single and mixed-mode manufacturing are supported. The system also includes barcode tracking, costing, scheduling, Gantt charts, a visual shop floor, material management, purchasing, shipping, and quality management.

A fully integrated and comprehensive accounting solution, Visual Books, is optionally available. Visual EstiTrack interfaces with the on-premises QuickBooks accounting solution.

Visual EstiTrack ERP’s revolutionary Touch Scheduling Board allows managers and operators to communicate throughout their shop using touch screen monitors. The Touch Scheduling Board’s drag-and-drop tools, automated scheduling, and real-time operations monitoring enable staff to easily view priorities, order statuses, and due dates.

Visual EstiTrack is an ideal fit for small and medium-sized job shop owners seeking comprehensive ERP functionality, affordable pricing, and speedy implementation. Henning Software products support multi-currency and multi-site operations.
