ERPFOCUS

ACUMATICA CLOUD ERP EXTENDED PROFILE

Acumatica
The Cloud ERP

OVERVIEW

Acumatica Cloud ERP is a best-in-class business management solution with functionality for small and mid-sized businesses.

It is built with open APIs for rapid integrations with other critical software. Its consumption-based licensing charges for resources used, not per user, and its future-proof platform drive value and provide flexibility, efficiency, and remote collaboration.

ACUMATICA MODULES AND FUNCTIONALITY

Acumatica has six industry editions:

- General Business
- Distribution
- Manufacturing
- Retail
- Construction
- Professional Services

Each bundles the modules a particular sector needs most, from sales order and warehouse management to project accounting and construction compliance tracking.

Additional modules like advanced expense management, multi-entity accounting, or commerce connectors for Shopify and BigCommerce can be licensed separately as a business grows, so you pay only for the functionality currently in use.

PRICING OPTIONS

Licensing is available as a SaaS subscription hosted in the public cloud, with Acumatica managing the underlying infrastructure and upgrades, or as a Private Cloud Subscription hosted with a provider of your choice.
