ERPFOCUS

SAGE X3

EXTENDED PROFILE

Sage

OVERVIEW

Sage X3 is an AI-powered, cloud-first ERP for product-centric organizations. It's most popular among manufacturers, wholesale distributors, life sciences and chemical and process industries.

Using Sage Copilot, Sage AI, and AI Agents, it helps businesses automate processes across finance, operations, and supply chain with real-time insights for smarter decision-making.

Sage X3 is suitable for a wide range of industries, including manufacturing, distribution, and business services.

KEY FUNCTIONALITY

- **Production Management:** Manage all manufacturing processes with capabilities such as BOM planning, shop floor control, quality control, and project management.
- **Supply chain management:** Monitor inventory in real-time to keep up with demand. This module covers purchasing, inventory management, sales management, and customer service.
- **Financial management:** Gain control over budgets, accounting, fixed assets, and financial reporting, ensuring compliance and real-time global visibility.
- **Multi-entity and language Support:** Ideal for global businesses, Sage X3 supports multiple locations, currencies, and languages.
- **Business intelligence:** Embedded analytics and customizable dashboards provide actionable insights for decision-making.

Sage has flexible deployment models, allowing businesses to choose between on-premises, cloud-based, or hybrid solutions based on their needs.

Cloud deployment offers easier scalability, accessibility, and lower IT maintenance costs, while on-premise installations give organizations full control over infrastructure and security.
