DELTEK MACONOMY

EXTENDED PROFILE

Deltek

OVERVIEW

Deltek Maconomy is a project-based ERP solution developed by Deltek and designed specifically for professional services firms, including consultancies, engineering practices, and architecture firms. The system provides a high standard of automated reporting and real-time financial and operational insight, supporting the full lifecycle from opportunity management and project delivery through to finance and management oversight.

There are two core components: Deltek Maconomy Business Performance Management and Touch Time for Maconomy.

- Touch Time functionality provides secure, mobile access to time entry and approval workflows from Android and iOS devices, enabling consultants to record time as work is performed rather than retrospectively.
- The Business Performance Management tools provide a centralized business intelligence layer, delivering up-to-date, reliable data across finance, projects, and resource management and integrating with widely used third-party applications, including Microsoft Office. Reports are available in a wide variety of formats and can be configured through role-based, customizable dashboards.

All Deltek Maconomy software is available in multi-currency and multi-language configurations, supporting international professional services organizations, and integrates tightly with the Microsoft ecosystem, including Microsoft SQL Server, SharePoint, and other Microsoft technologies.

Companies that have implemented Deltek Maconomy ERP software include Canadian IT support company Greycon, global water management company Deltares, and Midwest USA accounting consultancy business Boulay Heutmaker Zibell and Co. Deltek Maconomy pricing is typically provided on a quote basis, reflecting factors such as deployment model, number of users, and required modules, which allows organizations to align costs with their operational complexity and growth plans.
